Hanging displays in trams and buses

For cliffhangers

Format/execution

Uniform poster format: 25 cm wide × 35 cm high

- Printing:** The posters can be printed on one side or both sides.
- Mounting:** the posters must have 2 pinholes, see dimensional drawing: distance of 15 cm from the centre of one hole to the centre of the other, 1 cm from the upper edge to the hole centre, hole diameter exactly 0.5 cm.

Given the way that hanging displays are attached, all important graphic elements must be located at least 2 cm from the top and bottom edges of the hanging display.

The distance of 15 cm must be measured from the centre of the holes. Hole diameter: 0.50 cm

Maximum dispenser box width: 20.6 cm

Production

- Posters:** paper weight for standard posters must be min. 400 g/m², max. 600 g/m² (thickness: 0.5 to 1 mm).
- Dispenser posters:** paper weight of 800 g/m² to prevent bending (laminated posters, 2 × 400 g/m², are also possible, provided they are flexible enough). See illustration for width and distance to edge.
- Dispenser boxes:** made of sturdy cardboard (min. 600 g/m²) and glued tuck-in flaps. The dispenser boxes need to be extensively glued to the base poster (rather than point by point) so that they do not become detached. Maximum depth: 2 cm.
- Dispenser cards:** as a rule, in A6 format, sturdy quality, delivered bound and pre-filled in the dispenser boxes.

Materials will be disposed of by VBZ after the campaign has ended if no contrary instructions are provided 10 days before the campaign starts.

- Delivery quantity for hanging displays: 10% more than the quantity ordered.
- Hole diameter: exactly 0.50 cm.
- Depth: max. 2 cm.
- The cardboard must be sturdy and flexible (0.50 to 1 mm thick).
- The dispenser boxes have to match the flyer size (at least two-thirds of the flyer height).
- Approx. 50 to 70 flyers per dispenser (guideline).
- No Plexiglas dispenser boxes.
- No folded or tucked dispenser boxes.
- No adhesive areas with double-sided tape or hot glue.
- **The hanging display must have a border of 2.20 cm on either side.**
- **Dispenser boxes must be an integrated component of the hanging display and must be affixed to the display at least 2.50 cm above the lower edge.**
