Transparent window decals in trams and buses

Crystal-clear benefits

Production

Execution:	4-colour CMYK digital printing
Format:	50 × 25 cm
Printing:	The text/image is printed on transparent, self-adhesive decals for dry adhesion inside the vehicles, with the content facing correctly. Partial white is possible, e.g. for fonts and logos; white base decals are not permitted.
Colours:	lightfast colours are recommended for longer campaigns. No more than 40% colour across the entire surface. Scotchcal decals are not permitted.
Installation and removal:	are undertaken by VBZ and included in the price. Transparent decals must have a grip tab (on the right) to peel off. The decal must not be cut in any way.

Special formats:	by arrangement with VBZ TrafficMedia.
Specifications:	decal may not turn opaque. Decal must be easy to remove. Permanent adhesive is not permitted. Adhesive temperature range: from +10°C to +38°C. Temperature resistance: from -40°C to +80°C (see technical specifications document at www.vbz.ch/trafficmedia).

Decal material:	we recommend 3M IJ20-114R, JAC Graphics Serilux or Avery Greenline Transparent. Alternative products are permitted provided they correspond to the requirements given.
------------------------	--

VBZ TrafficMedia may reject transparent decals that do not meet the requirements or charge additional expenses for their removal.
